MEET YOUR PROJECT CHALLENGES HEAD-ON

The essence of effective project controls is the ability to connect all the dots.

Achieving project certainty is difficult when disparate systems create redundancies and provide conflicting answers, when job site communications can't keep up with the pace of changes, and when a reliance on disconnected spreadsheets makes it impossible to get timely and accurate reports.

InEight® Project Suite helps you connect all the dots to get a clear picture of where a project stands, so you can make the best decisions going forward. Feature-rich and field-proven, InEight Project Suite connects people and projects through the real-time sharing of information and is built on an open, flexible and interoperable technology platform that drives seamless integrations with other systems.

Conquer your projects with certainty

With InEight Project Suite, you can create and manage estimates, budgets and forecasts; simplify contract management; and streamline work planning and field data collection.

The result is an entirely new level of project certainty, built on a disciplined approach to project controls that's proven and based on industry best practices.

Field-proven on job sites like yours

With InEight Project Suite, we put our more than three decades of experience building software solely for the construction industry to work for you. We give you unprecedented visibility into the health of your projects and portfolios, which has earned the "seal of approval" from more than 20,000 active users just like you on job sites around the world.

Project cost management

Bring projects in on time, under budget and with the knowledge gained from past projects to improve operational efficiencies, reduce risk and drive project certainty on future projects.

InEight® CONTROL **InEight® ESTIMATE**

Project administration

Make the best project decisions by integrating and automating contract life cycle management activities related to materials and contractors, along with key information to manage contract risk at the project or portfolio level.

InEight® CONTRACT

Field execution

Streamline office-to-jobsite collaboration with a complete work planning system that connects all the dots. This enables you to publish daily plans to field team members who can capture quantities, hours and inspections on their mobile devices.

InEight® INSPECT **InEight® PROGRESS** **InEight® PLAN**

Actionable insights

Avoid project surprises by gathering timely, accurate data from across the project portfolio and gain deep project visibility with KPI-driven reports and dashboards that provide strategic and operational insights.

InEight® REPORT

Enable anywhere, anytime

InEight's flexible platform gives project teams anywhere, anytime access to cost and project performance data for all or select projects. Additionally, it connects to third-party applications, such as enterprise resource planning/ accounting, scheduling and document management systems.

InEight builds construction project management software that enables you to overcome your greatest project challenges. Our solutions span the entire project life cycle from design to estimate and from field execution to turnover and asset management. They provide the real-time information and insights you need to minimize risks, improve operational efficiency, control project costs, make educated decisions, and collaborate easily with all project stakeholders.
