INEIGHT

THE MISSING LINK THAT TURNS DATA INTO INSIGHTS

ACTIONABLE INSIGHTS

Know where your project stands — and where it's going. With true certainty.

Visibility into job performance is important to anyone charged with project success. Without an accurate view of how the work is progressing, you can easily be surprised by cost overruns, productivity changes, unexpected delays and other obstacles to project success.

InEight is creating a new era in construction where you have access to actionable insights and deep visibility into your project. With InEight® Report, you can minimize risks on your project and confidently make better decisions faster because you have a true understanding of the current status of your project at every level.

Immediate action

InEight Report provides actionable insights by turning project data into meaningful information. It offers pre-loaded KPIs and role-based access, which means stakeholders can quickly gather data and see critical information that is most relevant to them. This allows them to identify issues earlier and make more informed decisions.

Quick access

Manual processes for data collection that use disparate systems across the project portfolio makes consolidated reporting difficult and inefficient. InEight transforms this approach. InEight Report provides quick access to reports, dashboards and charts across multiple systems and disciplines. Bringing together this data gives you a clear and easy-to-understand view of project performance.

Take the guesswork out of what drives project certainty by getting the right information at the right time to drive business decisions.

Unique views

InEight Report helps all project stakeholders gain a greater understanding of the revenue, costs and productivity performance at the project and portfolio levels. With the ability to see summarized, granular or any level of details, everyone now stays informed and can take corrective action with confidence.

InEight®
REPORT

This unique solution gathers critical metrics from across the project portfolio and generates reports and dashboards to provide strategic and operational insights faster and more efficiently.

- Quickly gather key information across the project portfolio

- Identify critical issues through alerts, color coding and trends without pages of reports

- Uncover insights to make more informed decisions

- Gain easy access to information when, where and how you need it

- Stay on target with industry metrics and pre-loaded KPIs

InEight builds construction project management software that enables you to overcome your greatest project challenges. Our solutions span the entire project life cycle from design to estimate and from field execution to turnover and asset management. They provide the real-time information and insights you need to minimize risks, improve operational efficiency, control project costs, make educated decisions, and collaborate easily with all project stakeholders.
