

VIRTUAL DESIGN & CONSTRUCTION

# AN ENTIRELY NEW WAY TO BUILD

WITH VDC SOLUTIONS FROM INEIGHT

INEIGHT 

IMAGINE IF...

You could connect all of your construction project data.

NOW, MAKE IT A REALITY.

With InEight's Virtual Design and Construction solutions, you can now integrate any data source that is relevant to your project.

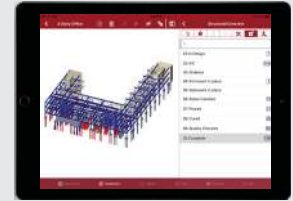

# ENRICH THE MODEL THROUGHOUT THE ENTIRE PROJECT.

Create a common data environment where model data is connected with previously unharnessed project information and is instantaneously visualized for every stakeholder.

## ENRICH THE MODEL WITH PROJECT CONTROLS DATA.

- Enhance the common data environment with cost, schedule and budget information from Microsoft Project or Primavera P6.
- Link drawings, specifications, emails, transmittals, and photos to relevant model elements.

## CONSOLIDATE INTO A COMMON DATA ENVIRONMENT.

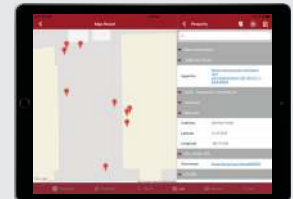

- Centralize multiple models from different sources into a single digital package.
- Eliminate irregularities between models.
- Deliver graphical data representations of project progress, issues and risk.

## VISUALIZE PROJECT ACTIVITY BY GEOLOCATION.

- Capture and report on locations of materials, assets, incidents and issues at the job site to manage and document within the model for turnover.

## COMMUNICATE AND STATUS FIELD-EXECUTED WORK.

- Use mobile-ready models to visually represent daily work plans to field personnel.
- Flexibly package the model for field personnel to search and enrich.
- Digitally capture work completed to graphically display in the model.
