ALL YOUR PROJECT DATA IN ONE PLACE

USING VDC SOLUTIONS FROM INEIGHT

From concept to O&M and everything in between, InEight Model connects all of your project data in a common data environment for all stakeholders to use.
ENRICH THE MODEL THROUGHOUT THE ENTIRE PROJECT.

Manage and share project information in a common data environment where model content is connected directly to documents and asset data.

COORDINATE CONCEPT TO CONSTRUCTION FROM A COMMON DATA ENVIRONMENT

- Connect unlimited models and files to create a single digital package, an enriched digital twin.
- Link drawings, specifications, photos or any relevant data files to model elements.
- Manage spatial coordination, quickly visualize problem areas and track accountability through issue resolution.

VISUALIZE EVERY REVISION OF EVERY MODEL ELEMENT IN ONE PLACE

- Provide all stakeholders access to even the most complex models without specialized, high-performance hardware.
- Quickly save and share contextually rich model views with the project team.
- Easily navigate between design and construction and record models in the same environment.
- Visualize model content based on data from other sources. Track installation status, issue count or any other data point.

MANAGE PROCESS AND ACCOUNTABILITY FOR THE LIFETIME OF YOUR FACILITY

- Maintain a complete history of project data that can extend into maintenance and operations.
- Share a document library that is intelligently linked across models, QA/QC and commissioning and is accessible from the office and in the field.

InEight builds project management software that enables you to overcome your greatest challenges on capital projects. Our solutions span the entire project life cycle from design to estimate and from field execution to turnover and asset management. They provide the real-time information and insights you need to minimize risks, improve operational efficiency, control project costs, make educated decisions and collaborate easily with all project stakeholders.
