Over **\$400 billion** dollars' worth of construction projects around the world have relied on InEight's field-tested project management software.

Customers have seen a **30% improvement** in staff utilization using InEight construction software solutions.

InEight software clients have experienced up to **8% savings** in internal IT costs.

## COMMITTED TO INNOVATION

InEight is unmatched in its dedication to developing software that transforms capital projects. The company significantly invests in research and development and is continually advancing its products.

With hundreds of software developers around the world working hand in hand with industry professionals, InEight is able to develop solutions that directly solve the needs of owners, contractors and engineers.

## HISTORY

InEight's origins date back to 1989 when our groundbreaking estimating and project cost management solution began to revolutionize the capital projects industry. After becoming a subsidiary of Kiewit, one of North America's largest engineering and construction firms, InEight set out to develop an end-to-end solutions platform that would support the intensifying needs of capital projects undergoing enterprise-wide digital transformations.

InEight took its vision to the next level in 2018 with a series of bold acquisitions. First, the

company added a complete collaborative document management solution with the purchase of QA Software and its flagship product, TeamBinder. Soon after, it acquired Basis to offer an artificial intelligence-based planning, scheduling and risk solution. And with the acquisition of M-Six, InEight fulfilled the need for advanced visualization and safety, quality and commissioning workflow engines. Today, InEight is the only provider of a truly integrated and cloud-based platform for every stage of the capital project life cycle.

*"Gearig started this journey looking for a software solution and quickly changed our thinking. Instead of picking software, we picked a business partner who was innovative, evolving and growing. Our advice, don't look at where software companies are today. Rather, compare where these companies were five years ago, evaluate where they will be in five years and then pick the best partner."*

**Mark Johnson, Business Development,  
Gearig Civilworks**

### DRIVING PREDICTABLE PROJECT OUTCOMES

InEight's solutions are designed to make sure project stakeholders have the information they need when and where they need it. This provides them with insights to avoid project surprises and make informed adjustments, while keeping projects on time, on budget and built to the highest quality.

### OUR MISSION

Ensure project stakeholders have all the information they need, when and where they need it, to make better decisions from an end-to-end construction platform.

### OUR VISION

To change the future of work within the construction industry by assembling a talented and diverse global team to deliver improved outcomes, predictability and safety to all project stakeholders through a complete end-to-end construction platform.

### OUR PURPOSE

To challenge how the capital projects and construction industry leverage data to realize proven project certainty at every phase of construction.
